G. W. Rouse was in Lethbridge on Wednesday visiting his son in the hospital there.

A representative of the Milwaukee Brush Co. has been in Raymond for the past two weeks displaying his lines.

Due to the chilly weather of Sunday, no services were held in the Second Ward Chapel. The heating plant is being installed now.

The Town Hall is nearing completion and the heating system is being installed and the interior decorating being done at present.

Judging from the newspaper reports the storm last week was general over the province with lower temperatures in many places than were reported here.

D. W. Card Jr. of Cardston, called on Mr. and Mrs. S. B. Card, Mr. and Mrs. Grant Card and Mr. and Mrs. S. I. May after the Sunday School Convention here on Sunday.

Don't forget the big Supper and Dance on October 31st for the benefit of the Memorial. You will get full value for your money, and will help a good cause too.

The local Women's Institute will hold their Annual Poppy Sale on Saturday Nov. 8, and Thanksgiving Dance, Monday evening Nov. 10 in the Opera House. Watch these columns next week for more particulars.

Mrs. McKay of the Dominion Chautauqua was here Monday evening and met with some of the local committee members regarding details of the coming Chautauqua program.

EXPERT OPTICAL SERVICE

Mr. A. Melville Anderson, Optometrist, of Anderson and McLean, Sight Specialist, Calgary wishes to announce his regular visit to the Raymond Pharmacy, Thursday, Oct. 30th. Eyes examined, Glasses fitted.

Get your tickets early for the Memorial Dance and Supper on Oct. 31. Everyone should patronize this cause. If you can't come to the Supper, contribute the mite anyway. The money must be raised.

Mark Jensen and others are working on an indoor golf course, in part of the old O'Brien-Nalder building. It promises to be fully equipped with hazards and to offer pleasant pastime for the winter days.

The catalogue of the Calgary Fall Stock Sales is at hand and sales will be held as follows: Tuesday, Nov. 4th Cattle at 9:30, Swine at 1:30, Sheep (Ewes) at 2:30 Wednesday, Nov. 5th Sheep (Rams) 9:30 and 2 o'clock.

Mrs. Whitelaw of Coaldale district was struck down by a car in North Lethbridge near Supina's Store on Saturday at 2:30 expiring 20 minutes after she was hit. The car was driven by Milnead Field, who is employed by Distributors Ltd. The jury exonerated Field from any blame.

Walter Rouse, the son of G. W. Rouse who lost his leg in the accident at the Sugar Factory recently, will have to undergo another operation as gangrene has set in the bone a little higher. He is optimistic and cheerful about it, however and this will help a great deal.

GET YOUR CHAUTAUQUA TICKETS

Chautauqua tickets are now for sale and can be obtained from a number of citizens. One piece of good news this year is that the Tax has been removed from Chautauqua Tickets, so you will just have the price of your ticket (plus Reserve Seat charges if you wish reservations.) The program promises plenty of variety and good clean entertainment and the committee can promise patrons full value for their money. Dates are Nov. 8-10-11-12; 6 programs in the four days.

Notice to Taxpayers!

THE TOWN NEEDS MONEY:

In order to get collections in, we will give a 5 per cent. discount on all Taxes paid between now and November 30th, 1930.

Don't wait until the last day to pay, as we will not be able to issue all receipts on the last day.

O. H. SNOW, Sec.-Treas.

GENERAL CONDITIONS

(Monthly Commercial Letter of the Canadian Bank of Commerce)

A moderate seasonal improvement in business is now under way. It is not, however, general in scope, some industries having found it necessary to curtail their operations even further than during the summer, and in areas where adverse influences have continued to be felt the improvement has been correspondingly less than elsewhere. For example, the demand is below the average over the greater part of the Prairie Provinces and in many lumbering districts, while it is above the average in most metal-mining regions.

With the clearing away of crop uncertainties and with an industrial plant (including one of her foremost metallurgical industries) greatly enlarged during the past year, Canada now looks closely for any signs that the decline in world business has been arrested. This country depends upon outside markets for the sale of 40 per cent. of the grains it produces, 80 per cent. of its forest products (including paper), over 60 per cent. of its metals and about 70 per cent. of its fish. Accordingly, the subject of world economic conditions is ever important, but at this time, the beginning of a new marketing year for Canadian products, it looms up prominently in business analysis. Canada is now in a position to go ahead; a glance at the table of estimated crops will show that farm production is well above that of 1929; and Canadian mines, mills and factories, a large part of which are among the most efficient in operation, have a productive capacity far above that of any former year. The future, then, depends upon conditions elsewhere, and these will bear the most careful attention during the next few months. For the present it may be noted that the tone of reports from some major countries is slightly better, but this should not be taken as heralding a marked upturn in world business; perhaps the best that could be expected would be an end to the progressive deterioration in world purchasing power, which set in over a year ago. How great has been that deterioration may be judged by the fact that the purchasing power of a group of Continental European countries took the sharpest drop since 1922.

RUSSIA AS A FACTOR IN WORLD TRADE

A disturbing element in world trade is the increasing pressure of Russian products at a time when the world market is overburdened with materials from other sources. There is a great mass of literature available on post war economy of Russia, particularly that of the last few years. Some authorities, including one who has made a life-long study of Russia to the present "Five-year Economic Plan," predict an absolute failure; others foresee complete success; and still another group sees only the probability of progress far short

of the objective. In any event as a result of the "Plan" industrial productivity was increased by 16 per cent in 1928-29, although there is still a shortage of both manufactured goods and food. The motive force behind Russia's export programme, is, however, the purchase, as far as possible on credit, of large quantities of machinery and other materials necessary for the execution of this "Plan"; Russia may consider herself politically aloof from the rest of the world, but she admits that she needs foreign capital consisting of Russian products, principally wood and grains. We may consider some of the effects of this Shipment of Russian lumber to the programme upon Canadian business. United Kingdom have more than doubled in the last few years; plans were made to ship this year 500,000 standards (990million board feet), of which at least three fifths has already been dispatched. This supply for the English market has reacted upon the lumbermen in the Maritime Provinces who hitherto disposed of part of their cut in the United Kingdom. American paper manufacturers have contracted to take this year 300,000 cords or more of Russian upwood; consequently their demand for Canadian pulpwood has declined. There are various estimates of the quantity of Russian wheat to be exported this year; Wheat's is 15 but 50 million bushels but it is doubtful if anyone knows how much will be shipped.

To discuss Russian agriculture in detail so as to furnish a complete account of the present wheat situation one would have to go back at least a hundred years. In 1926, when the Bank made an analysis of the prospects of Russia's re-entry into the wheat export trade, it seemed possible that importing countries could expect a fair supply from this source almost every year. But unforeseen difficulties upset the Government's plans and within the last few years the Government has developed State farming on a large scale and has mobilized peasant farming over an extensive area. This reorganization of agriculture was intended to give the government control over the supply of grain, part of which would be used to settle its obligations for imports. It may be noted that the quantity available for this purpose depends to some extent upon the willingness of the peasants, including those who have "pooled" their activities under the Government's collectivization scheme, to turn over a proportion of their crops to the authorities; the latest information from a reliable source indicates that some peasants are showing reluctance to meet the Government's requirements. At any rate, Russian wheat has recently been offered in Liverpool at 8 cents below comparable Canadian grades. These external trade activities must be recognized as depressing factors. While lumbering in the Maritime Provinces has been declining for years and is not a large unit in the national industry, the competition of Russian lumber affects an area of this coun-

YOU CAN VOTE WHEN YOU ARE ON LIST

No matter who you may be, but particularly if you are a renter or householder and not a property owner, you must see for yourself that your name is on the 1930 municipal voters' list, which has been prepared and is posted at the Town Assessor's Office in the Town Hall. On this list you may look up your name (alphabetically listed) and if it is not there, or if it is incorrectly spelled, or if the occupation is incorrect, it is your privilege to see Mr. Snow and make sure it is put on the said list with all the details correct. The final date for amendments to this list is October 31st, after which the final revision is made and no more names added or altered. Moral: "Look now that you may not lament later."

R.S.A. OPENING DELAYED

Because of the rush of the beet harvest, and to allow some who were coming late to get in at the beginning, the opening of the Raymond School of Agriculture has been postponed from Oct. 28 to Nov. 4th.

Prospective students will please take notice and govern themselves accordingly.

News Notes

B. F. Tanner was here last Friday on business.

Mark Austin and Mrs. Allen were the speakers at the Sunday evening meeting held in the Stake House, when the two wards met together. Elder Austin spoke on the life of Geo. Q. Cannon, and Pres Allen spoke on the recent General Conference. A large congregation was present and everyone fully enjoyed the meeting.

Here lumbering has been important. The competition in wheat is of course, the greatest factor and, it seems, must be reckoned with in the future.

An economic programme which it is hoped will achieve within five years all in the way of progress that could reasonably be expected of any country in a century, is subject to many risks of foreign as well as of domestic origin, and there is some reliable evidence that the working of the "Plan" is stirring up external opposition. The press has carried full reports of investigations made by the United States Government in regard to importation of pulpwood and to speculation in wheat, but the fear of Russia's trade activities is not confined to such restrictions, nor to any one country. The National Lumber Manufacturers Association of the United States is preparing to request its Government to prohibit Russian lumber.

Mark Austin Here

Mark Austin, agricultural superintendent of the Utah Idaho Sugar Co. was here over the week-end and gave the farmers some good advice and a lot of encouragement regarding the harvesting of the beets yet in the ground. In the various districts they found some beets dug and well protected, some on the ground without any protection. All growers were urged to protect their beets in every way possible, to aid themselves and also the Factory.

The weather moderated on Sunday and by Wednesday noon beet plows were in the fields and the crop coming out of the ground. The beets will of course suffer from the cold snap, but if cure is used from now on the results will be satisfactory.

Mr. Austin and local company officials are urging that all possible help be obtained now and every effort bent to a quick wind up of the beet harvest.

If the crop can be gotten out of the ground and delivered to the dump it can then be cared for much more economically and expeditiously than in small piles in the field.

Now is the time to get the Beets.

Statue Will Arrive Early Next Week

The white marble statue which will top the Soldiers Memorial arrived in Montreal on October 20, and will arrive here early next week. It is a life standing at ease and is the work of one of Italy's best sculptors. The local G.W.V.A. have been much concerned regarding this statue for fear it would not arrive by Nov. 10, but they are glad to know that it will soon be here.

Now folks Friday night next week is the Memorial Supper and Dance. The sponsors of this Memorial are very desirous that all indebtedness in connection with it be paid off before the unveiling and this supper and dance is your chance.

We all eat. Why not get a Supper Ticket at least and while we are enjoying a good chicken Supper, help the Memorial Committee in their drive.

Here is the Menu: — Chicken and Dressing, Cranberry Sauce, potatoes, peas, carrots, combination salad apple and pumpkin pie, tea, coffee and cocoa, assorted pickles.

Get your 75c ready for the Supper and read the ad. on the last page.

Jack Coombs Again Remarried

Coming up before Magistrate Hamilton on Wednesday for preliminary hearing on the charge of manslaughter brought about through the shooting of Verden Larson at Raymond on October 5, John James Coombs of Raymond was remanded for trial at the next sitting of the supreme court in the city early in November.

Mrs. O. H. Snow, was in Cardston for the Temple sessions this week.

Mr. and Mrs. S. I. May were in Cardston Thursday evening for the wedding reception of Mr. and Mrs. Virgil Quinton.

Lowell Court and Miss Thelma Cahoon surprised their many friends early this week by a quiet wedding. They are well known and popular and have the best wishes of their many friends.

Hall C. Poulsen of Magrath, a brother of Percy Poulsen, was married Friday, Oct. 17 to Miss Ila Cook of Magrath. Both young people are well known in the district and are receiving the congratulations of their many friends.

The Capitol management takes pleasure in presenting upon the talk-in screen tonight and Sat. Dennis King in Paramounts all technicolor Musical Romance The Vagabond King. Based on one of the most successful of recent stage musical shows—Special Matinee on Saturday at 1 P.M. to accommodate factory employees.

Three Splendid Bills Presented

The ever popular Maude Henderson Players filled a three day engagement at the Capitol theatre Monday, Tuesday and Wednesday of this week and were up to their usual high standard. The audiences while small, fully appreciated the offerings and will welcome these people when they return again.

Without going into too much detail we must say that the company this year were all A 1 in their stage work. The two Gray brothers Percy and Ed, and Mrs. Ed, need no introductions to Raymond audiences, nor any praise from us, as their names always mean the most there is in the interpretation of a part, and this year was no exception as their work was all that could be desired.

The other members, the three Liskum sisters and Jack Rank and Paul Putman made a host of friends in their appearance here.

These people furnished musical selections singing and dancing of a very entertaining nature and their stage work was creditable indeed. No dull moments were experienced by the audience on any of the three nights.

We trust that these folks may all come and see us again and that another year the lack of money in our midst will not reduce the usually good attendance as it did this year.

Every ward in the Stake was represented at the Sunday School Convention on Sunday.

George W. Jackson, aged 21 years of Calgary died on Saturday in the General Hospital, three hours and 10 minutes after the bakery rig he was driving tipped over and threw him to the ground. An inquest was held on Monday.

An Open Letter to Beet Growers

Raymond Alberta
October 21, 1930

Dear Fellow Beet Growers
We are facing an extreme condition in our sugar beet harvest. There now remains about 50 per cent of our crop, or 50,000 tons of beets frozen in the ground. These beets have a value, if properly harvested, of \$350,000 to the growers. That is a huge sum of money, and important at any time but it becomes doubly important in this period of low wheat prices and general financial depression. It is, therefore essential that we bend our every effort toward the successful completion of our beet harvest.

We are indebted to the Canadian Sugar Factories Ltd. for this additional cash crop in our Southern Alberta Agriculture. This Company faces disaster if they receive beets which cannot be made into sugar (the price of sugar is very low, in view of which, our initial payment for beets is high) The mixing of frozen with unfrozen beets after they are harvested would cause serious loss if accepted by the company. This loss they are not prepared to sustain.

They have now received some 14,000 tons of frozen beets when the terms of our contract made that step unnecessary. Their attitude has always been fair, and favorable to the growers.

Complete instructions for harvesting the balance of our crop have been issued. If these instructions are adhered to by the growers our beets will not be rejected at the receiving stations and neither party will sustain loss.

We ask you as growers, therefore, to study the instructions you have received and co-operate fully with the company and their field men, in this important matter, for their protection and your own.

The very fine spirit of co-operation and cordial and pleasant relations which have characterized our work in past years bespeak the earnest support of the farmers in this extreme condition.

This support, we have assured the Company, will be gladly given.

Yours for a complete and successful harvest,

Alberta Co-operative Sugar Beet Growers' Association,
Louis Brandley, Pres.

PROSPERITY AT HOME

Last week Lethbridge celebrated a Prosperity Week. We do not know how successful it was, but we know this that Lethbridge business houses made a real bid for business in prices and advertising, and tried to make people feel that Lethbridge was the place for Lethbridge people to trade.

We believe that the Trade at Home slogan not for one week, but every week of the year is the keynote of success for Raymond and every other community. And this goes for a Buy at Home policy on the part of every business man one to another. We want everybody to come to us for ALL of the wares we have to offer, but we consider the other guy should feel O. K. If we buy even a PART of what we need in his line from him. So much for that.

What is Prosperity, except that it means the continuous circulation of the thing we call money, or purchasing power. We are interested in Prosperity for Canada, but first we are interested in Prosperity for Raymond, and every dollar we spend in Raymond will help make that prosperity.

You may say, well from 40 to 60 cents of that dollar will go to wholesalers to replace what I bought. That may be so, but the remainder of that dollar will be spent here and ultimately you will get a share of it. If you spent it elsewhere you help pay the taxes for some other town and help furnish employment for other people to the detriment of yourself.

This season finds us trying to devise means to make a satisfactory settlement of our accounts and have enough to live on during the winter. We do not think much will be gained by doing any of your spending away from home. In the first place the people who have financed your year's operations are the ones who should be considered first. Go to them, pay what you can and spend what you have to spend with them to show them you appreciate what they have done to help you. Dodging those you owe and sending your cash out of town establishments gives you a guilty conscience, and in case of dire want and need, would you go to these out-of-town firms for help. Well hardly.

Remember—"A good name is better to be chosen than great riches." Keep your name good and help Raymond on to greater prosperity.

PAY YOUR TAXES NOW

Why not pay your taxes today? You can get the benefit of the discount until Nov. 30th. But why wait until the last few hours of the last day, and then charge the office in a mad scramble to get there first.

If you have the means, why not now. The amount will get no smaller and you will be conscience free then. If you procrastinate something may intervene and the taxes remain unpaid and then you lose your discount and perhaps pay a penalty as well. Act now and be safe.

FASCINATING LINKS IN CANADIAN HISTORY

Ottawa, October 22: (Special to the Recorder)—In the Grey Room of the Archives is a small bust of Charles James Fox, a figure connected with the history of England from 1749 to 1806. Charles James Fox was the third son of Henry Fox and was the grandson of Charles II.

In the bust of the distinguished man at the Archives will be seen some of the early characteristics which were noted of him when he began public life. He was stout and his face is rotund. It is the model of a handsome man but as was said his "swarthy countenance had a 'saturnine' aspect but his smile was always pleasant."

The life of Fox is interesting to Canadians chiefly because he opposed the Quebec government bill objecting to the providing for the duration of the Canadian parliaments, the reserves for the clergy and the institution of an hereditary nobility to sit in the council. The reference he made to French politics in the course of debates in the House on this subject made a breach between him and Burke, the noted Irishman of the government of that time.

Biographies have been written about Fox and they are all intensely interesting, revealing the life of a man whose mind was clear and judgement sane.

WORLD'S GRAIN SHOW NOTES

ONTARIO'S CHALLENGE AND OPPORTUNITY

The people of Ontario are determined to see that their home province will make a creditable showing in the competitive classes of the World's Grain Show at Regina in 1932. The members of the provincial committee are untiring in their efforts to use every available means of stimulating activity towards this end, and their confidence in the final result is very well expressed in an interesting, illustrated article by Prof. Squirrell of Guelph and J. A. Carroll of the agricultural department, Toronto, published in the Farmer's Advocate (London) of October 2. "It is recognized on every hand, say these gentlemen, 'that Ontario has a splendid chance to play a prominent part thru exhibits from the province. The outcome, however, is largely in the hands of grain and seed growers to whom the competition is open, and the desire expressed in all circles that they should rise to the occasion and achieve still greater fame for themselves and for the province in 1932.' Prof. Squirrell and Mr. Carroll aptly conclude this excellent article by saying that "To Ontario the World's Grain Show and Conference is both a challenge and an opportunity."

JUNIOR JUDGING COMPETITION

Great interest has been aroused throughout the Dominion and many of the States of the Union in the recent announcement that a junior grain Exhibition and Conference. Many enquiries have been received in the last week or so by officials of the Exhibition from agricultural societies and junior grain clubs throughout Canada while similar organizations in parts of the United States have signified their desire to become acquainted with the rules and regulations. Copies of the preliminary announcement may be obtained, upon application, from the Secretary, World's Grain Exhibition and Conference, Imperial Bank Chambers, Regina Canada.

NATIONAL COMMITTEE MEETING

A meeting of the National Committee of the World's Grain Exhibition and Conference has been called to meet in Toronto at the time of the Royal Winter Fair, in the week of November 15. Hon. Robert Weir, Minister of Agriculture for Canada, is chairman of the National Committee and has associated with him the Minister of Agriculture for the different provinces, Deputy Minister, the heads of universities and agricultural colleges, and representatives of federal and provincial government departments, transportation companies, producers organizations, commercial and financial institutions, the press and the managers of exhibits.

TREND OF BUSINESS IS MORE PROMISING THROUGH THE DOMINION

Ottawa, October 22: (Special to the Recorder)—It is believed by the trend of business, that the low point of the economic depression in Canada has passed. Sales of winter lines have improved. Prairie turnover although manufacturing is still at a low ebb. The Maritimes and Quebec provinces are harvesting satisfactory crops. Ontario anticipates a light corn crop but a fair tobacco crop.

Eastern shoe and leather manufacturers are experiencing a much better demand and are consequently producing on a more active scale. The textile industry is unsettled but optimistic forecasting increased production with less competition from Japanese and Czech lines. One of the largest of the Quebec mills is reported to be bringing additional looms into operation to increase its output from 65 to 80 per cent. capacity. Ontario inventories in textile lines are low and some dealers predict an actual shortage although Fall orders are smaller than usual.

The August production of Canadian plants, 9,792 units, is the lowest of the year to date, being 4 per cent under July and 31 per cent under August 1929, production. Eastern demand for electrical apparatus has improved somewhat and hardware distributors in that section are satisfied with the general outlook, although sales are below last year's level. A slight pick-up is noted in Winter specialties, including seasonal sporting goods, which are moving fairly well. Substantial increases are noted in Ontario prices for window glass. Seasonal quiet rules the agricultural implement market, where demand is light; the machinery market has not improved.

Cover have been advanced, but the Water proof clothing prices in Vancouver goods market there continues quiet. The British Columbia pack of canned salmon to Sept. 20 totals 1,814,000 cases, a record for the province. Foodstuffs are reported to be moving

FOLK DANCING AND DRAMATIC READING

Mrs. Julia E. Asplund wishes to announce that she will give lessons in Dramatic Art and Folk Dancing commencing immediately. Either private lessons or classes can be arranged.

In nearly normal volume in Ontario, but stocks on hand are fairly low. August production of pig iron and steel in Canadian plants was substantially under July output and was only about half of the total for that month of last year. A slight gain, however, is noted in the output of ferro-alloys.

Town Planning in Alberta

(Being a series of short articles explanatory of the provisions of The Alberta Town Planning Act and Regulations thereunder.)

BY HORACE L. SEYMOUR
Provincial Director of Town Planning

Article 6

MAINTAINING THE SCENIC ADVANTAGES OF ALBERTA HIGHWAYS — GASOLINE FILLING STATIONS, REFRESHMENT BOOTHS

More unappealing to the eye than advertising signs may be refreshment booths sometimes erected; and gasoline stations are not always built to accommodate their customers without interference with highway traffic. These matters are taken care of in recently promulgated regulations and in the 2,500 miles of main highways of the Province (outside of cities, towns, or villages) the locations and design of filling stations, garages or refreshment booths must be approved. Nor can any new private structure be nearer the centre of these main highways than 60 feet. Provisions supplementary to sanitary regulations already in force, are also included in regard to tourist camps. The general object of the regulations in regard to such public conveniences is also required.

The regulations which should maintain traffic safety, convenience and amenity, read in part:

On any declared (main) highway the design, location and construction of any building or part thereof, which is or is intended to be used as a gasoline filling station, garage, automobile service station or for the purpose of supplying travellers with refreshment shall be subject to the approval of the Town Planning Advisory Board. All applications for approval shall be submitted to the Director of Town Planning, Parliament Buildings, Edmonton.

Plans, designs and specifications are to be furnished with the application forms, and a yearly license fee are not to prohibit, but to assist in co-operation with the owners in making their buildings and equipment more attractive to the public and hence more remunerative to the owner himself.

THE TENTH OLYMPIAD

Los Angeles, California—Plans for the Olympic Village for housing and feeding athletes during the Games of the Xth Olympiad in 1932, are engaging the attention of the Organizing Committee which is completing all of the details of this very big and important feature of the preparations for the coming world event.

The Village plan was received enthusiastically and adopted at the recent Olympic Congress in Berlin, although it was possible at that time for the Organizing Committee to present only a general idea of the plan. However, since their return to Los Angeles, representatives of the Committee have given constant thought and attention to the Village plan, and within four months all details regarding it will be made public. A pleasant surprise for National Olympic Committees is predicted when these details are announced.

The Organizing Committee believes that the health, comfort and peace of late entourage are of principal importance in the success of the Games. The mind of the athletes and their immediate correct training diet in each country's own cuisine is assured under the Olympic Village plan. The Committee is going to very great expense and effort in preparing the Olympic Village plan, which it believes will be accepted by all countries as an ideal arrangement.

The Committee is suggesting to all National Olympic Committees that attaches be appointed to maintain a very close contact between the Organizing Committee and the visiting teams. These attaches will have offices to the Olympic Village during the Games, and being familiar months in advance, with the personnel and details of operation of the Organizing Committee, will be of great service to the countries they represent.

MEETING OF NATIONAL COMMITTEE WORLD'S GRAIN EXHIBITION AND CONFERENCE

Hon. Robert Weir, Minister of Agriculture for Canada has instructed the secretary of the World's Grain Exhibition and Conference to call a meeting of the National Committee of the Exhibition and Conference at Toronto

UNDER CONTROL or NO CONTROL?

UNDER CONTROL: WITH BEER BEING SOLD BY REPUTABLE LICENSED HOTELS UNDER GOVERNMENT SUPERVISION.
NO CONTROL: WITH BOOTLEGGERS RUNNING RAMPANT AS IN THE OLD PROHIBITION DAYS.

Reasons why you should NOT sign the prohibition petition urging the government to abolish the sale of beer by the glass or bottle, thus doing away with the beer rooms, clubs and cantens.

1. THE PROPOSAL TO DISTURB THE ACT COMES FROM A SMALL BODY OF PEOPLE WHOSE SOCIAL THEORIES HAVE NOT WITHSTOOD THE TEST OF ACTUAL EXPERIENCE.

2. THE TRADES AND LABOR CONGRESS ARE ON RECORD AS BEING IN FAVOR OF THE SALE OF BEER-BY-THE-GLASS.

3. BY VIRTUE OF THE LOCAL OPTION PROVISIONS OF THE ACT, COMMUNITIES MAY EXTINGUISH A LICENSE WHEN A MAJORITY OF PUBLIC OPINION SO EXPRESSES ITSELF.

4. NO LICENSE HAS BEEN WITHDRAWN AS A RESULT OF A LOCAL OPTION VOTE EITHER IN 1929 OR 1930, THOUGH LICENSES ATTACKED WERE AT POINTS WHERE CONDITIONS APPEARED TO THE PROHIBITIONISTS, AS FAVORABLE TO A DRY RESULT.

5. IN A TOTAL OF 58 LOCAL OPTION VOTES TAKEN SINCE THE ACT CAME INTO FORCE ONLY FOUR LICENSES HAVE BEEN CANCELLED AS A RESULT OF VOTES; AND THESE LICENSES WERE IN EVERY CASE ADVERSELY AFFECTED BY PECULIAR LOCAL INFLUENCE.

6. ABSENCE OF CRITICISM AT THE LAST TWO PROVINCIAL ELECTIONS.

7. HOTEL ACCOMMODATION, PARTICULARLY AT COUNTRY POINTS, HAS IMPROVED AS A DIRECT RESULT OF THE ACT, TO A STANDARD UNQUALLED IN ANY OTHER PROVINCE.

8. THE GENERAL ENDORSATION OF THE ACT BY THE TRAVELLING PUBLIC AND THE WILLINGNESS OF THE PUBLIC GENERALLY TO ASSIST IN ENFORCING THE ACT BY GIVING INFORMATION REGARDING INFRACCTIONS AND INTERDICTING THOSE NEEDING PROTECTION FROM THEIR OWN WEAKNESSES.

9. BOOTLEGGING AND MOONSHINING HAVE BEEN ELIMINATED AS REMUNERATIVE PURSUITS. THIS, TOGETHER WITH STRICT GOVERNMENT CONTROL, HAS PLACED ALL INTOXICATING LIQUOR BEYOND THE REACH OF MINORS; FEWER CASES OF INTOXICATION IN THE POLICE COURTS, IN SPITE OF A CONSIDERABLE INCREASE IN POPULATION, LEAVE THE POLICE OF THE PROVINCE FREE TO PERFORM THEIR NATURAL FUNCTION, THAT OF PROTECTING THE PEOPLE, NOT TAKING UP THEIR TIME TRYING TO ENFORCE WHAT HAS PROVED TO BE UNENFORCEABLE LEGISLATION. REMEMBER YOU CANNOT LEGISLATE MEN'S MINDS, BECAUSE THEY WILL NEVER OBEY A LAW THEY DO NOT RESPECT. THIS WAS PROVEN IN PROHIBITION DAYS.

10. THE OPERATION OF THE ACT PROVIDES A LARGE PUBLIC REVENUE (4½ CENTS OF EVERY 10c. EXPENDED) THIS HAS HELPED TO INCREASE THE GENERAL REVENUE OF THE PROVINCE AND PREVENT INCREASED TAXATION. FORMERLY SUCH REVENUE WENT TO BOOTLEGGERS AND MOONSHINERS.

11. OFFICIAL REPORTS COMMEND THE ACT AS EMINENTLY PRACTICAL. THEY CONTAIN NO IMPORTANT CRITICISM OF THE ACT'S CLAUSES. POLICE REPORTS INDICATE A CONTINUOUS IMPROVEMENT IN THE GENERAL STATE OF LAW AND ORDER.

12. THE REAL MOTIVE PROMPTING THE PETITION IS TO RENDER THE ACT UNWORKABLE BY ELIMINATING THE RETAIL SALE OF BEER-BY-THE-GLASS OR BOTTLE; THE ULTIMATE AIM BEING A RETURN TO TOTAL PROHIBITION.

If the beer rooms and clubs are abolished what does the Prohibition Party suggest to take their place? Is it to be liquor for the wealthy and prohibition for the worker?

The Moderation League of Alberta

date of the meeting is not yet announced but in all probability it will be held during the week commencing November 16. Hon. Mr. Weir in his official capacity as Federal Minister of Agriculture is chairman of this National Committee.

The National Committee of the World's Grain Exhibition and Conference comprises the Minister and Deputy Minister of Agriculture for the province, the heads of Universities and Agricultural Colleges representatives of federal and provincial government departments, transportation companies agricultural producers organizations, commercial and financial institutions, the press, and the managers of exhibitions.

Just prior to the meeting of the National Committee there will be meetings of the Executive and Finance Committee, under the chairmanship of Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, the Awards Committee under the chairmanship of L. H. Newman, Dominion Cerealists, the Boy's and Girl's Judging

during the Royal Winter Fair. The Competitions Committee, C. M. Hamilton, chairman, the Publicity Committee, Dr. J. H. Grisdale, Deputy Minister of Agriculture for Canada, chairman.

MILK FOR HEALTH AND BEAUTY

Esther Raiston, a well known screen actress, who has been making personal appearances in theatres throughout the country, singing and dancing several times daily insists upon a glass of milk before each performance in every city she visits.

"Since my early childhood," says Miss Raiston, "my chief nourishment has been derived from fresh fruit, vegetables, nuts and milk. Milk, particularly keeps my complexion clear and healthy, and every few days I bathe my face in sour milk. In this strenuous stage and screen life, I have discovered that pure milk has a soothing effect on highly strung nerves, and I drink a large quantity daily instead of using coffee, tea or other stimulants."

Of greatest interest, perhaps, to

millions of young women is Miss Raiston's statement that she finds a glass of milk, at intervals during the day, most refreshing and invigorating and "not at all fattening."

This statement is supported by two other women—Flora Rose, director, and Mary Henry, professor of nutrition, New York State College of Home Economics. Cornell University as follows:

"Milk is maligned by many persons as a fattening food and is thereby strictly avoided. A diet is fattening or reducing according to the number of calories taken in relation to the body's total expenditure of calories more quickly than, or as quickly as, one serving of a score of other foods that the person on a reduction diet is very willing to accept. It is because milk carries such high values other than and along with its calories, supplying substances not easily obtained from other foods, that a part of the total calories in every diet should come from milk."

HYGIENE OF THE NOSE

The nose has more than one important function. By warming or cooling the air we breathe, it adjusts it to the temperature of the body. At the same time, it moistens and filters the air. The nose is the organ into which drain the sinuses or body cavities which lie adjacent to the nose. A large part of our sense of taste really is the sense of smell as perceived through the nose.

A healthy nose filters, warms and moistens the air before it reaches the lungs. If we breathe through our mouths, this control of the air is lost, and the air arrives inside of the body without the preparation it should have, and which it would have received had it been breathed in through a healthy nose.

The healthy nose does not need to be washed out. Indeed, there is some danger in the use of washes. The way to clean the nose is to blow it gently, one nostril at a time. If the nose is not healthy, then the use of sprays of drops is recommended by the physician to relieve the condition and to restore the nose to a healthy state in which it is best able to do its work and to cleanse itself without interference.

The two symptoms which most commonly occur and which indicate that there is something wrong with the nose are obstruction to breathing and excessive secretion from the nose.

When a child cannot breathe freely through the nose, he becomes a mouth-breather. This usually means that there are adenoids obstructing the nasal passage. Every child is born with some adenoid tissue at the upper and back part of the nose. If the adenoid tissue grows beyond a certain size, it obstructs nasal breathing and should be removed. In addition to obstructing breathing, it will very likely result in partial loss of hearing if not removed.

When we catch cold, the secretions of the nose are altered in a way with which we are all familiar. The cold is serious because it makes us miser-

able and interferes with our work. It is very serious when the germs responsible for the cold spread to other parts. If they spread into the sinuses connected with the nose, a yellowish secretion from the cold, is a sign that one or other of the sinuses is affected.

Infected sinuses are serious even though they are draining freely and not causing any pain. Any collection of pus in the body is a focus which may undermine the general health and be responsible for disease in other parts of the body. Such a focus of infection should be treated promptly.

Obstructed breathing should be corrected, because it is necessary for the promotion of health to breathe freely through the nose. Children who are mouth-breathers should be examined for adenoids, and these should be removed if they are found to be obstructing the nasal passage. Colds should be cared for in order to prevent the spread of infection throughout the body, and if the infection does spread into the sinuses, treatment should be secured soon even if there are no acute symptoms at the time.

MACHINERY OUSTS 50,000 WORKERS ON POWER UNDERTAKING

Ottawa, October 23; (Special to the Recorder)—Startling evidence of the manner in which machinery replaces man power was presented early this month when directors of the Beauharnois Power Company conducted representatives of 80 Canadian daily and 500 Canadian weekly newspapers over the huge St. Lawrence Power development now in progress between Lake St. Louis and Lake St. Francis, Quebec.

Machinery there is replacing over 50,000 men on a two-and-a-half year job. A staff of 2,200 men plus machinery, between 50,500 and 60,000 men to complete it in the same period.

The ultimate development may reach 2,000,000 while that now under way will provide 500,000 horse power of energy. For a distance of fifteen miles and through a canal 3,000 yards wide a new route is being cut across country for the St. Lawrence. In it will be a passage 600 yards wide, the first big link in the deep water navigation development of the St. Lawrence between the Lakes and Montreal.

To carry on the work the corporation has laid and operates 30 miles of railway, power transmission lines for equipment, telephone lines to maintain contact with headquarters, is re-routing rivers and railway lines and highways; in fact is engaged upon a project so immense that a few years ago it would have been possible only for a government to contemplate it.

The chief feature of the undertaking is the manner in which manual labor has been curtailed. A single electric hydraulic dredge is cutting 13½ miles of the new canal basin, sucking out the material and depositing it up to a mile distant at a rate that would require a whole army of men, if manpower were employed. Other great power and drag-line excavators move more earth and rock every two minutes than a dozen men could move in a full ten hour day.

What machinery is really doing is made clear by the fact that 50,000 men employed at only \$80 per month for thirty months would cost \$120,000,000 in wages, while the total cost of the Beauharnois development now under way will be \$65,000,000 and this includes the 28,000 acres of land purchased for the project and all the materials which enter into it. Machinery is reducing the direct labor cost from \$120,000,000 to probably \$10,000,000 and thereby making possible the sale of power at a price that will create industry and thereby give permanent work to more than are now deprived of temporary employment through the mechanization of construction work.
